CREATIVE WINDOW FILM SOLUTIONS!

Thank you for contacting Solar Vision Inc. for your next project! We can be your one stop shop for samples, specifications, and consultation on window film projects. Did you know we're much more than that? We're Colorado's #1 3M Window Film Dealer, because we also install thousands of square feet of film every year.

What this means for Architects?

When specifying 3M Window Film products on plans, it's normal to just specify the product. This is ideal for small jobs, like a few frosted windows to hide a wall, or a couple of storefront units that need tint. However when dealing with more comprehensive projects you may want to assist your General Contractor in finding the right company to hire. This will ensure your client is getting the exact product's you've chosen for their project.

WHY INCLUDE SOLAR VISION INC. IN YOUR SPECIFICATIONS?

Accuracy: We'll ensure the correct 3M product is installed

Customer Service: Unlike most window film companies we have a team of Estimators, Project Managers, and Office Staff here to assist with everything from pricing, contracts, to installation

Expert Installations: While most window film companies use Sub-Contractors, Solar Vision Inc. has a team of professional Window Film Installers

SOLAR VISION INC. STANDS BY OUR 5 CORE VALUES

When working with Solar Vision Inc., you are working with a Reliable, Quality, Ethical, Positive, & Resourceful company. We'll work hard to uphold the integrity of your project plans and specifications by ensuring the correct installation using the required products.
